## Findings

1. The site is an appropriate location for the proposed second parking stall within the front setback because the parking will be in the same location as an existing driveway. (§7.3.3.C.1)
2. The additional parking stall within the front setback will not adversely affect the neighborhood because the second stall will be located in an area that is already paved. (§7.3.3.C.2)
3. There will be no nuisance or serious hazard to vehicles or pedestrians because the curb cut and configuration of the driveway will be similar to the existing conditions. (§7.3.3.C.3)
4. Access to the site over streets is appropriate for the types and numbers of vehicles involved. (§7.3.3.C.4)
5. Literal compliance with the dimensional parking requirements is impracticable because the site is on a corner lot and an alternate location is likely to result in an increase in paved area. (§5.1.13)
